

Study within a trial (SWAT) Workshop

January 12th 2017 1-3pm

Wellcome Trust - HRB Clinical Research Facility
seminar room

The HRB-Trials Methodology Research Network is offering grants of up to **€10,000** to facilitate the embedding of a study within an ongoing trial. The SWAT should address an independent methodology research question on either the design, conduct, analysis, reporting or dissemination of trials, for which there is current uncertainty.

This **FREE** workshop provides an overview of SWATS and discusses some examples of current SWATS. The workshop will be of interest to any health professional currently engaged in a randomised trial or with an interest in becoming involved in trials.

The workshop will be led by **Dr Valerie Smith**, Teaching Fellow at HRB-TMRN and Assistant Professor of Nursing & Midwifery at Trinity College Dublin.
