

GOOD CLINICAL PRACTICE IN MEDICAL DEVICE RESEARCH

NOW AVAILABLE
ONLINE!

Do you need to know about clinical investigations?

This course provides investigators, research staff, device developers and sponsors with information and guidance on how to plan and carry out medical device research.

Content includes:

- Overview of Clinical research
- Device classification and clinical evaluation
- Governance of medical device research
- Good clinical practice in planning and conducting medical device research
- Safety and quality issues

This course is provided by the RCSI Clinical Research Centre in collaboration with the School of Postgraduate Studies.
